SUMMARY

Software Engineer with 3 years experience building scalable backend systems, from Linux middleware to Machine Learning powered automation pipelines. Ready to deliver solutions that solve real world problems.

WORK EXPERIENCE

Visteon Corporation

Van Buren, MI, USA

Software Developer – AI & Innovation, IT, Automation

Jun 2025 – Present

- Developed AI solution using **OCR**, **Azure Openai** to study the Design Diagram and automate the generation of Bill of Materials for Automotive tier 1 supplier.
- Engineered the data flow to **migrate SQL** logic to Oracle for 8+ tables (5M records), decreasing the Power BI visual load times from **60 to 15 secs**, leading to increased Business User Satisfaction
- Collaborated with a data analyst to implement and test **delta load logic** for incremental data processing.

Intel Corporation

Santa Clara, CA, USA

Software Engineer Intern – Machine Learning, Automation, Python

May 2024 – Dec 2024

- Automated the **defect creation programtically** to streamline the process, saving 70% of hardware engineers time by populating the bug details via **REST API**.
- Delivered a Machine Learning pipeline that runs **DBSCAN clustering** to group SoC design paths, auto generate waiver codes, leading to a left-shift in fixing Setup/Hold violations.
- Developed AI solution by training and inferencing a **XGBoost model** to predict delays, reducing IO budgeting iterations from 10 to 6.
- Presented **POC AI use-cases** in Electronic Design Automation to boost the productivity of SoC designers.

Visteon Technical and Services Center

Bangalore, KA, India

Software Engineer – Embedded Linux, C, Java, SQLite, IVI

Jan 2021 – Jul 2023

- Designed and deployed a media file favorites feature across **Android middleware**, enabling easy access to multimedia files for 500+ **Harley-Davidson** IVI users.
- Developed **AIDL interfaces** and business logic for 3 multimedia features enabling efficient **Inter Process Communication** between android services in a complex multi-threaded stack.
- Implemented Factory Reset to enforce **disaster recovery** by re-syncing media files enforcing 100% reliability
- Debugged 45% of **JIRA defects** in audio playback & browsing by root cause analysis of logs.

SKILLS

Software Engineering:	Python, C, Java, REST APIs, Distributed Systems, Microservices, Multithreading, Inter-Process Communication, Automation scripting.
AI & Data:	Machine Learning, Gen AI, NLP, scikit-learn, SQL, PostgreSQL, Oracle DWH
Systems & DevOps:	Embedded Linux, AWS, Enterprise Security, Azure, Docker, Jenkins, CI/CD, Git-Lab, Terraform, Automotive IVI, Android Middleware, HDFS.
Achievements:	Visteon Excellent Performance Award , AWS Cloud Practitioner

KEY PROJECTS

DoctorAssist.AI (Streamlit, GenAI, NLP, Gemini API) Apr 2025

- Developed a natural language-to-SQL query engine to streamline healthcare data access, enabling clinicians to retrieve patient information efficiently using conversational queries, improved access speed by 40%.

Used Car Data Analysis (AWS, EC2, S3, boto3, PySpark) Nov 2024

- Designed a distributed data pipeline to analyze large-scale used car listings and extract pricing insights, improving dealership pricing strategy efficiency by 25%.

Delivery Management Service (React.js, Node.js, MongoDB, Google Maps API) Dec 2023

- Built an intra-city package delivery platform enabling instant pickups alongside regular courier, reducing delivery time by 50% and increasing operational transparency.

EDUCATION

Master of Science in Computer Science - Software Engg, Applied Machine Learning GPA 3.87
Indiana University Bloomington, IN, United States May 2025

Bachelor of Engineering in Computer Science - Algorithms, OS, Networks, Full Stack Dev GPA 8.08
Visvesvaraya Technological University, KA, India August 2020
