Software Engineer with extensive experience developing quality software, ML workflows and optimizing DB systems. Ready to take responsibility for solving complex real world problems beginning May 2025.

WORK EXPERIENCE

Intel Corporation – Software Graduate Intern

May 2024 - Dec 2024

Santa Clara, CA, USA

- Co-worked with VLSI expert to build a ML workflow to cluster caliber reports, generate regex patterns parsed by Python script to **auto generate the Bucket file**, resulting in a **65% reduction** in manual coding.
- Integrated and deployed an AI solution to predict IO constraints, **reducing 4 iterations** of IO budgeting.
- Extracted data from timing reports, transformed it into CSV format, and loaded it into PowerBI for system health monitoring, which assisted the management team in enriched decision-making.
- **Automated the bug filing process**, constraints verification by developing a data pipeline using SQLite, Python and REST API, **eliminating 50% of manual efforts**, thus streamlining the process flow.

Visteon Corporation - Software Engineer 2

Jan 2021 - Jul 2023

Bangalore, KA, India

- Designed, tested, and deployed over 10 scalable IVI product features **for Linux and Android-based multimedia systems**, improving user experience in areas such as browsing, audio playback, audiobook detection, and media file favorites marking for OEMs like **Harley-Davidson, Mahindra, and JMC**.
- Reengineered a backend DB schema to **minimize memory use** & accelerate DB transactions
- **Led a team of two developers** to achieve a 30% reduction in logs, improving defect troubleshooting.
- Drove a comprehensive code cleanup effort, simplifying the file structure, **eliminating 800 lines of legacy code written in C/C++**, and utilized **version control tools(Git)** for code reviews.
- Performed thorough **root cause log analyses** to debug and rectify multimedia defects across Android stack.

SKILLS

Technologies : Machine Learning, SDLC, LLM, Pyspark, Data modeling, Linux, Android App development, JNI, Automation, Pytest, AWS, REST API, ETL, HDFS, Software Documentation, HTML, Arm.

Software Tools : AOSP, Android Debug Bridge, GitLab, PlantUML, Jenkins, Gen AI, Docker, Hadoop.

Languages & DB: C/C++, Python, Core Java, SQL, SQLite3, PostgreSQL, mongoDB, Oracle.

PROJECTS

[Used Car data analysis](#) (AWS, EC2, S3, boto3, Pyspark)

Nov 2024

- Built an AWS **data pipeline** to perform data analysis using **distributed computing** and trained multiple ML models on AWS sageMaker, derived insights using QuickSight to generate business critical visualizations.

[Delivery Management Service](#) (ReactJS, Node.js, mongo DB)

Dec 2023

- Spearheaded the development of a full stack application for **efficient package management** with security features and precise navigation to streamline the delivery process, manage payments using StripeAPI.

EDUCATION

Indiana University Bloomington, IN, United States

May 2025

Master of Science in Computer Science

GPA 3.85

Visvesvaraya Technological University, Belgaum, KA, India

Aug 2020

Bachelor of Engineering in Computer Science

GPA 8.08

CERTIFICATIONS

AWS Certified Cloud Practitioner

Feb 2025

Excellent performer – Spot award

May 2022
