

RUTURAJ MARATHE

930-333-2566 — marathe.rutu11@gmail.com — linkedin.com/ruturaj-marathe — github.com/memarathe — portfolio

OBJECTIVE

Software Engineer with 2+ years of experience in software development, automation, and machine learning. Proficient in building production-ready applications using modern software engineering and cloud technologies. Passionate about delivering solutions in a forward-thinking team.

WORK EXPERIENCE

Intel Corporation

May 2024 - Dec 2024

Software Graduate Intern – ML, Tools Flow Automation

Santa Clara, CA, USA

- Automated bug filing by building RESTful APIs with Python script to interact with external endpoints, reducing manual effort by 70%.
- Reduced manual effort by 65% by collaborating with cross platform team to build a ML-based workflow using DBSCAN clustering to categorize SoC design paths and automate waiver codes.
- Optimized IO budgeting, reducing 4 iterations by training an XGBoost model to predict IO delays.
- Enabled system health monitoring by building a data pipeline using python script to extract raw data, structure it and load timing reports into Power BI, improving data accessibility by 60%.
- Visualized weekly VLSI path failures, reducing analysis time by 30% by building a web dashboard.

Visteon Corporation

Jan 2021 - Jul 2023

Software Engineer 2 – Android multimedia, C, Java, SQLite

Bangalore, KA, India

- Optimized SQL queries and backend DB reducing transaction time & memory usage by 30%.
- Implemented Factory Reset to enforce disaster recovery by handling media database states across the vehicle battery cycle, enforcing 100% fault tolerance.
- Designed and deployed a media file favorites feature across Android middleware, enabling easy access to multimedia files for 500+ Harley-Davidson IVI users.
- Resolved 45% of JIRA defects in audio playback & browsing by root cause analysis of logs.

SKILLS

Languages & DB: Python, C, Java, SQL, PostgreSQL, mongoDB, AWS RDS, AWS S3

Technologies: Linux, SDL C, Relational Databases, Restful API, Software automation, AWS SDK, HTML, CSS, React.js, node.js, CI/CD, Machine Learning, HDFS, Pytest, ETL

Software Tools: Version Control, Github actions, Gen AI, Hadoop, JIRA, Jenkins, AWS Quicksight

Certifications: AWS Cloud Practitioner (2025), Excellent performer Visteon Spot award (2022)

KEY PROJECTS

DoctorAssist.AI (StreamLit, NLP, GeminiPro API, Prompting)

Apr 2025

Developing a text-to-SQL genAI model for Electronic Health Records (EHRs) to enable healthcare professionals to access medical data through natural language queries.

Used Car data analysis (AWS, EC2, S3, boto3, Pyspark)

Nov 2024

Streamlined data processing by building a robust AWS pipeline using Python enabling distributed data analysis and model training on SageMaker to help auto dealers drive strategies.

Movie Revenue Prediction (Web scraping, Data modeling, Data analysis)

Mar 2024

Leveraged ML models such as RFR and Neural Networks, to predict the movie's revenue and identifying & visualizing the low-rating quarters assisting the producers refine release timelines.

Delivery Management Service (ReactJS, Node.js, mongo DB)

Dec 2023

Spearheaded the development of a full stack application for efficient package management with security (MAuth) features and precise navigation (Google maps API) to streamline the delivery.

EDUCATION

Indiana University Bloomington, IN, United States

May 2025

Master of Science in Computer Science - Software Engg, Adv Database, Applied ML

GPA 3.87

Visvesvaraya Technological University, KA, India

Aug 2020

Bachelor of Engineering in Computer Science - Algorithms, OS, Networks, Full Stack Dev

GPA 8.08
