OBJECTIVE

Software Engineer with 3 years of experience in product-based software development and backend systems. Seeking opportunity to apply Automation, Database optimization & cloud skills to contribute to your team.

WORK EXPERIENCE

Intel Corporation

May 2024 - Dec 2024

Software Graduate Intern – ML, Tools Flow Automation

Santa Clara, CA, USA

- Reduced manual effort by 65% by developing an ML-based workflow using **DBSCAN clustering** to categorize SoC design paths and automate waiver code generation.
- Optimized IO budgeting, **reducing 4 iterations** by training an XGBoost model to predict IO delays.
- Enabled system health monitoring by building an **ETL pipeline** to structure and load timing reports into **Power BI**, improving data accessibility by 60%.
- **Automated** debugging by 30% by identifying cross-talk buses in SoC timing reports through a Python script leveraging **NumPy and Pandas**, reporting the failed buses automatically.

Visteon Corporation

Jan 2021 - Jul 2023

Software Engineer 2 – Android multimedia, C, Java, SQLite

Bangalore, KA, India

- Designed and deployed a media file favorites feature across **Android middleware**, enabling easy access to multimedia files for **500+ Harley-Davidson IVI users**.
- Resolved 45% of JIRA multimedia defects in **audio playback & browsing** by root cause analysis of log files
- Optimized **SQL queries** and backend schema, reducing DB transaction time & memory usage by 30%.
- Achieved enhanced stability by implementing **Factory Reset** to enforce **disaster recovery** in an IVI system.

SKILLS

Technologies : Tooling **Automation**, AWS SDK, **SDLC**, Pyspark, Machine Learning, Pytest, RESTAPI, **ETL**, HDFS, **Android NDK**, Relational Databases, **CI/CD**, **Linux**, HTML, Selenium.

Software Tools : AOSP, **ADB**, **Version Control**, PlantUML, Gen AI, Docker, Hadoop, Github actions.

Languages & DB: **C/C++**, **Python**, Core Java, **SQL**, PostgreSQL, mongoDB, OOPS.

Certifications : **AWS Certified Cloud Practitioner (2025)**, Excellent performer – Visteon Spot award (2022).

PROJECTS

Used Car data analysis (AWS, EC2, S3, boto3, Pyspark)

Nov 2024

- Streamlined data processing and analysis by building a robust **AWS pipeline** with EC2, S3, boto3, enabling distributed data analysis(**PySpark**) and model training on SageMaker to help sales team drive strategies.

Sentiment Analysis (NLP, Python)

Jun 2024

- Developed a sentiment analysis model to classify Amazon product reviews as positive or negative, providing insights into customer opinions. **Utilized Python, NLTK, and Scikit-learn** for data processing, feature extraction, and text classification.

Movie Revenue Prediction (Web scraping, Data modeling, Data analysis)

Mar 2024

- Leveraged ML models, including Random Forest Regression (**RFR**) and **Neural Networks**, to predict the least favorable movie release timings. Identifying low-rating quarters helped producers refine release strategies

Delivery Management Service (ReactJS, Node.js, mongo DB)

Dec 2023

- Spearheaded the development of a **full stack application** for efficient package management with security (**MAuth**) features and precise navigation (**Google maps API**) to streamline the delivery process.

EDUCATION

Indiana University Bloomington, IN, United States

May 2025

Master of Science in Computer Science

GPA 3.85

Visvesvaraya Technological University, KA, India

Aug 2020

Bachelor of Engineering in Computer Science

GPA 8.08
