OBJECTIVE

Software Engineer with 3 years of experience in product-based software development and backend systems. Looking to apply machine learning, Database optimization, and cloud skills and contribute to your team.

WORK EXPERIENCE

Intel Corporation

May 2024 - Dec 2024

Software Graduate Intern – ML, Tools Flow Automation

Santa Clara, CA, USA

- Reduced manual effort by 65% by developing an ML-based workflow using **DBSCAN clustering** to categorize SoC design paths and automate waiver code generation.
- Optimized IO budgeting, **reducing 4 iterations** by training an XGBoost model to predict IO delays.
- Enabled system health monitoring by building an **ETL pipeline** to structure and load timing reports into **Power BI**, improving data accessibility by 60%.
- Improved debugging efficiency by 30% by identifying failing cross-talk buses in SoC timing reports through a Python script leveraging **NumPy and Pandas**.

Visteon Corporation

Jan 2021 - Jul 2023

Software Engineer 2 – Android multimedia, C, Java, SQLite

Bangalore, KA, India

- Designed and deployed a media file favorites feature across **Android middleware**, enabling easy access to multimedia files for **500+ Harley-Davidson IVI users**.
- Resolved 45% of reported multimedia defects in audio playback & browsing by conducting **root cause analysis of log files** across the Android stack.
- Optimized **SQL queries** and backend schema, reducing DB transaction time & memory usage by 30%.

SKILLS

Technologies : Workflow Automation, AWS SDK, SDLC, Pyspark, Machine Learning, LLM, Pytest, RESTAPI
ETL, HDFS, Android NDK, Relational Databases, Docker, Terraform, CI/CD, Linux, HTML.

Software Tools : AOSP, GitLab, PlantUML, Gen AI, Docker, Hadoop, JIRA, Android Debug Bridge.

Languages & DB: C, Python, Core Java, SQL, PostgreSQL, mongoDB.

PROJECTS

Used Car data analysis (AWS, EC2, S3, boto3, Pyspark)

Nov 2024

- Streamlined data processing and analysis by building a robust **AWS pipeline** with EC2, S3, boto3, enabling distributed data analysis(**PySpark**) and model training on SageMaker.

Movie Revenue Prediction (Web scraping, Data modeling, Data analysis)

Mar 2024

- Identified worst movie release timing by predicting low-rating quarters with **ML RFR, Neural net** helping producers improve release strategies and boost ratings by **10%**.

Delivery Management Service (ReactJS, Node.js, mongo DB)

Dec 2023

- Spearheaded the development of a **full stack application** for efficient package management with security (**MAuth**) features and precise navigation(**Google maps API**) to streamline the delivery process.

Sentiment Analysis (NLP,)

- Developed a sentiment analysis model to classify Amazon product reviews as positive or negative, providing insights into customer opinions. **Utilized Python, NLTK, and Scikit-learn** for data processing, feature extraction, and text classification.

EDUCATION

Indiana University Bloomington, IN, United States

May 2025

Master of Science in Computer Science

GPA 3.85

CERTIFICATIONS

AWS Certified Cloud Practitioner

Feb 2025

Excellent performer – Visteon Spot award

May 2022
